

Mailbox Shuttle

Migrate users quickly and safely to Exchange and Office 365.

Email is a mission-critical service, so it's important that when you migrate your live mail the solution you choose minimizes end user disruption, and uses intelligent automation to maintain compliance and business continuity.

How Mailbox Shuttle works

Mailbox Shuttle is an enterprise-grade solution for migrating email systems quickly and safely to Exchange 2010, 2013, 2016 and Office 365. The solution provides maximum efficiency with minimum intervention.

Mailbox Shuttle ensures continuous user email access, provides full checks, monitoring and reports, and is readily scalable. Chain of Custody and compliance best practice is followed at all times, and a full audit trail following Microsoft's best practices is maintained at every step of the migration process.

Mailbox Shuttle cloud

Mailbox Shuttle cloud gets you migrating in minutes. Its dedicated control module manages the migration without needing to deploy on-premises hardware.

Custom Script Engine

Email migrations are rarely done in isolation. There is usually a lot more going on than simply moving a mailbox. Use the custom script engine to enter these tasks into the work flow. From litigation holds, to licensing, and mobile device tasks - if you can execute the command in PowerShell, then you can put it into the work flow!

Sync'n'Switch technology

Mailbox Shuttle's proprietary Sync'n'Switch technology uncouples data synchronization from user migration, guaranteeing that users are not interrupted while their email is migrated.

This enables seamless migration across Active Directory (AD) forests, helps consolidate email across organizational boundaries, and enables email integration following mergers and acquisitions.

Mailbox Shuttle: Sample Workflow

Better Together

Experience the total power of Mailbox Shuttle! Quadrotech is the only migration vendor with a single suite of proven applications for migrating the entire email ecosystem. and achieve optional efficiency by combining Mailbox Shuttle with other Quadrotech products. This allows you to tie an archive migration, or a PST eradication project, into a single migration workflow. This allows all of the proper steps to execute at the correct time. Set a schedule once, let Mailbox Shuttle do the rest, and monitor the progress in a single console!

Key Features:

Comprehensive planning

Extensive analysis of information helps plan the migration effectively. This automatically accounts for Exchange or Office 365 restrictions, depending on the target.

Optimized for Exchange On-premises and Office 365

Users can be migrated to Exchange on-premises, Office 365 or a hybrid of the two.

Migration can be within the same organization or across Active Directory (AD) forests using Sync'n'Switch.

Transparent to users

No disruption to user productivity, with seamless email access - ensuring business continuity throughout the process.

Flexible and scalable

Optimized to manage thousands of users, with planning and scheduling applications ensuring best use of resources.

You can assign white and black periods for the migration process. These take into account mailbox migrations completed each day, together with planned migrations, allowing daily tasks to be defined.

Robust security

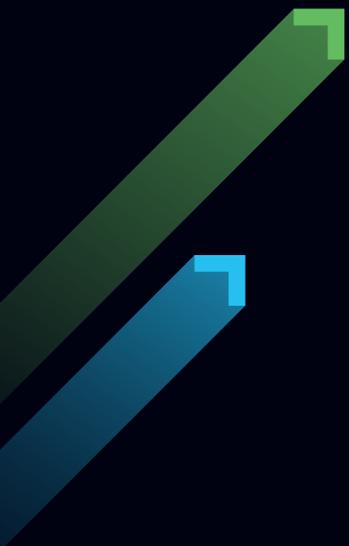

Compliance best practices are followed throughout, and a full audit trail is maintained. Roles and policies can be defined to control admin access and execution of migration activities.

PowerShell Scripting Engine

Powerful scripting engine allows for custom scripts to run before the migration starts, after the initial sync completes, or after the migration. Use cases include: applying or managing Office 365 licenses, enabling Skype for Business, adding additional SMTP addresses, and much more!

Simple, but highly customizable process

About Quadrotech.

Quadrotech enables organizations to make their Microsoft Cloud smarter, secure, and efficient, ensuring businesses get the most out of their IT investment.

By providing a suite of migration products, we help enterprises move data into and out of Office 365, or from cloud to cloud. Once the migration is complete, our advanced Office 365 reporting and security applications show how employees are using and configuring the service, and IT admins, or security and compliance teams can protect and audit their environment using detailed, filterable activity logs. Finally, we also offer a sophisticated management solution to streamline Office 365 administration, and make management simple, the tool can be used to delegate control of Office 365 to other users in the company with enhanced security and flexibility. Achieve smarter migration, reporting, security, and management with Quadrotech.
